

Opt-Emax
For reliable man entry

SAINT-GOBAIN

PIPELINES

For internal use only

Opt-Emax

Designed for your peace of mind

- **Ease of use:** man entry and installation become handy
- **H&S:** high safety performer
- **Durability:** equal performance decade after decade
- **Security:** anti-theft and anti-vandalism

Opt-Emax *So easy to handle!*

Quick & easy chamber access

Easy opening

- *One keyhole per cover*
- *Two hinges per cover*
- *One-stage opening*
- *One-man operation, even with very large covers*
- *Easy 90° blocking cover*

Opt-Emax *So easy to handle!*

Quick & easy chamber access

Easy closing

- *Easy disengagement of blocking cover*
 - unique “Tilt & Push” hinging design
- *Precise cover guiding when closing*
 - no risk of jamming or blocking, factors of hazard

Opt-Emax *So easy to install!*

Before bedding, lift up and remove covers from hinges

Use the lifting points on the frame

Opt-Emax *So “health and safety”!*

Operate safely!

- *90° blocking system*, preventing accidental closing
- Opened covers form *a barrier* over the chamber

Reduce back pain injuries!

- *Ergonomic design* helps to reduce injuries

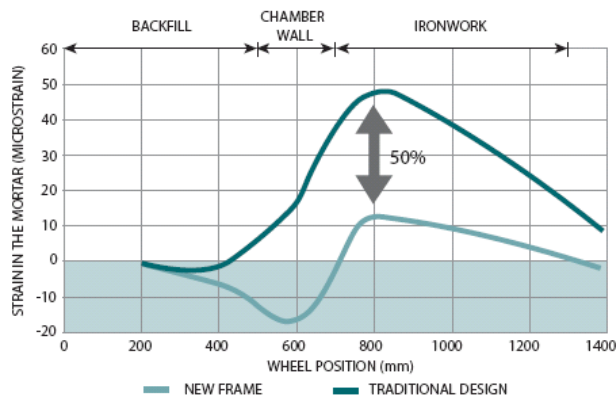

Save money!

- Injuries and accidents at work cost a LA or a Wplc up to *one man year*

Opt-Emax *So durable!*

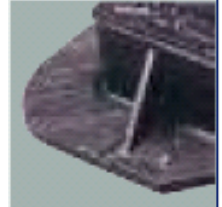

- 📌 **Ten years of full customer satisfaction**
- 📌 **Unrivalled Load Transfer System for stability and durability**
 - *Improved quality and longevity of the whole installation*
 - *Long lasting products improve long-term cost savings*

Load Transfer system

1 - Corner web

2 - Rib positioning

3 - Bonding ribs

4 - Flange stiffness

Opt-Emax *So secure!*

🔒 Vandalism causes you to urgently react:

- *Replacement of stolen cover*
- *Site safety implementation*
- *Traffic diversion*

🔒 Vandalism provokes public inconveniences:

- *Traffic jam*
- *Hazardous situations*

Opt-Emax *So secure!*

High security locking systems deter vandalism at affordable cost:

- *Master cover locks and secures the two covers*
- *Possible retrofit locking*
