

Our Home Office Approved locking screws can be fitted to any cover or grating that can be locked.

They will require the Home Office Approved corresponding key to release the screws.

Suitable for HMP prisons, private prisons, detention centres, secure homes, military areas and any place where extra security is required. These screws deter access from all but authorised personnel.

The screws are manufactured by one of only a handful of factories accredited by the Home Office. If you are in doubt please discuss with our security team who have many years' experience in this field.
